

```
import React, { Component, Fragment } from "react";
import { reduxForm, Field } from "redux-form";
import SemanticDatepicker from "react-semantic-ui-datepickers";
import { Form } from "semantic-ui-react";
import "react-semantic-ui-datepickers/dist/react-semantic-ui-datepickers.css";

class ProfilePersonal extends Component {
  render() {
    return (
      <div>
        <Form>
          <Form.Group inline>
            <Field
              component={SemanticDatepicker}
              name="dob"
              label="Date of birth"
              placeholder="select your DOB"
              size="small"
            />
          </Form.Group>
        </Form>
      </div>
    );
  }
}
```

A screenshot of a web form showing a date picker input field. The label "Date of birth" is positioned to the left of the input. The input field contains the date "2020-04-09" and has a small 'x' icon on the right side, indicating a clear or close button. The input field is enclosed in a light gray border.
